HOW TO BID (SEQ SALE)

In a sequential (SEQ) sale, lots in the auction are offered for sale sequentially i.e. one at one time.

How to start bidding

- ① In a SEQ sale, lots are sold one by one
- ② Scroll through the Lots to place your bid before it is brought to auction or wait for your preferred Lot to be called by the Auctioneer
- ③ Unlock it by clicking the padlock and place your bid. The lot will be green if you are holding the lot, and red if you have been outbid 

- ④ Always keep an eye on the timer at the top of the screen

HOW THE TIMER WORKS

- ① The timer shows how long the auction will stay open. When someone places a bid, the timer resets
- ② The timer becomes visible at the time set by the Selling Agent (or AuctionsPlus)
- ③ It starts counting down (e.g. from 60 seconds), then decreases in smaller increments (like 20s → 10s)
- ④ All lots close together – meaning if a bid is placed on any lot, the timer restarts for the entire auction
- ⑤ **TIP:**  **Green = You're winning**  **Red = You've been outbid**

PLEASE NOTE: Simultaneous auctions have no guaranteed minimum or maximum running time. The timer will be running across the top of your screen.

The National Charolais Sale

It is with great pleasure I write this sale forward. Charolais semen became commercially available back in 1969 starting a significant influence on Australian beef herds. For the first time Australian cattle breeders had access to genetics offering tremendous growth and muscle capabilities and less waste than the breeds then available. As the first European breed to enter Australia, Charolais had to forge their own destiny and I am happy to report, our breeders did a great job. Charolais today are the leading European breed based on registration and number of sires sold at auction data.

The breed had an insatiable demand in the early days with the first Australian Charolais sale held at Mandalong Park, St Marys on the 6th June 1970. More than 1,000 people attended this sale with the top price \$6,000 for Centrewood Babiller (imp NZ), a half-bred female.

We look forward to over 280 Charolais parading at the Brisbane EKKA feature show on the 7th August. These cattle have come from all over Australia and we sincerely thank exhibitors for contributing to our World Congress display. For potential buyers some of the exhibits at the Feature showing are on offer in this sale.

We thank the vendors for the quality on offer tonight, they truly have dug deep into their programs and opened the gates. If you analyse the achievements of the vendors in this catalogue, you will quickly understand the opportunity this sale presents. Talking to vendors it may be a long time for these opportunities to be offered again. I encourage potential buyers to reach out to vendors to understand the condition of the pick lots prior to the sale. A huge shout out to our sale associates, Elders Studstock and Auctionsplus, your level of expertise adds to our event.

Finally, to our international guests for the World Congress. Thank you for journeying to Australia, for many of you, it's a very, very long trip (*Australians know this well*). We hope you have the opportunity to meet our members, experience our hospitality, evaluate our Australian Charolais and get a glimpse into our way of life.

Colin Rex: General Manager

Charolais Society of Australia Ltd.

Gala information

The Charolais Society of Australia is hosting a premier Charolais sale during the Charolais World congress on **Friday 7th August 2026**. The sale will be held in conjunction with a Gala dinner at Voco, Brisbane and interfaced with Auctionsplus. All lots are sold at the fall of the hammer when full payment is due and payable. If the lot involves a pick, the selection of the animal must be completed by the terms of that lot in this catalogue.

Fertility Guarantee

a. Bulls are to be sold as fertile and capable of natural service. The Purchaser will have the right of cancelling the sale within six months of the date of the Sale if they can submit a Veterinary Report stating that the bull is infertile or incapable of natural service. The Veterinary Surgeon must state that, in their opinion, the bull has not suffered, since the delivery to the Purchaser, any injury or maltreatment which could have affected its breeding ability. The Vendor is liable to refund the purchase price of the animal in full.

b. All female animals are to be sold as guaranteed breeders. Females twenty-four (24) months and over are to be pregnancy tested in calf, or have a calf at foot. Vendors must supply a PTIC certificate for every female entered in the catalogues as PTIC. Females under 24 months may be entered as mated or unjoined.

c. Where the lot is a female between the age of twelve (12) to twenty four (24) months, and a Purchaser submits a Veterinary Certificate to a Vendor within twelve (12) months of the date of sale stating that a female is infertile, and in the Veterinary Surgeon's opinion, she has not suffered since the delivery to the Purchaser, any injury or maltreatment which could have affected its breeding ability, the Vendor is liable to refund the purchase price of the animal in full. This will not apply where an attempt has been made to transfer embryos/IVF from the female.

d. Where the lot, is an unjoined heifer under twelve months (12) of age, the purchaser has up to the date the animal is twenty four (24) months to submit a Veterinary Certificate to a Vendor that the female of joinable age is infertile, and in the Veterinary Surgeon's opinion, she has not suffered since the delivery to the Purchaser, any injury or maltreatment which could have affected its breeding ability, the Vendor is liable to refund the purchase price of the animal in full. This will not apply where an attempt has been made to transfer embryos/IVF from the female.

e. In this sale, a bull or a female resulting from a pick is the same as a bull or female offered live and is subject to the above guarantees.

Inspection

Lots: 3, 5, 8, 9, 10, 11 will be present at the Brisbane EKKa for inspection. All other lots can be inspected prior to sale by contacting the vendor for pre sale inspection. No cattle will be on site at the sale venue.

Delivery

Cattle onsite at Brisbane EKKa will be available for delivery at the conclusion of the cattle exhibition. Purchasers are encouraged to discuss transport arrangements with vendors after the sale. Live lots not onsite at Brisbane EKKa will be available for delivery from the vendors property. All delivery instructions are to be given to the agents in writing.

Transfer Fees

Transfer fees will be the responsibility of the Vendor in accordance with Charolais Society of Australia Ltd Regulations.

BREEDPLAN

All published BREEDPLAN performance traits shall be reported in the sale catalogue.

Health.

To be eligible for entry, cattle must originate from:

- A herd with a minimum J-BAS score of 6
- Each animal must belong in a herd accredited free or confirmed free of both Brucellosis and TB.

Genomic Test Results

Genomic test results listed in this catalogue have been supplied by the vendor from results supplied by testing facilities. Intending purchasers should consult with vendors to determine the test used and the suitability of the result for their own breeding program. The Charolais Society cannot bear direct liability or any consequential losses incurred by the purchaser should the test results supplied be deemed to be incorrect.

Conditions of sale for Interstate Purchasers

- Any animal, purchased for interstate movement, which requires further tests will be forwarded to an approved Quarantine area where appropriate tests will be carried out in compliance with the entry requirements into the destination state. The costs of agistment, transport and health tests are to be borne by the Purchaser of all cattle passing such tests, or by the Vendor should they fail to pass such tests. Payment for cattle to the Vendor will be made within the normal terms of sale whether or not the cattle have been tested for entry into the nominated state.
- In the event of the cattle failing health tests and sale being cancelled, the Vendor will refund all monies, paid as settlement, for the Purchaser.

Sale Catalogue Disclaimer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Charolais Society of Australia, or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Insurance

Insurance will be available on the fall of the hammer, please contact your agent.

Terms and Conditions

Please read and be aware of the Queensland Livestock Agents Association Limited - Standard Stud Stock Auction Terms and Conditions of Sale available from the selling agents.

Warilla Charolais proudly offers the right to flush one of the standout females of our program, Warilla Elegance V21, a **homozygous polled**, BPA free female we firmly believe is the best we have bred to date. Sired by the impressive \$100,000 Palgrove Rockerfella and out of our proven donor Charnelle Elegance 16, V21 combines an elite pedigree with exceptional phenotype and maternal strength. Retained in our stud as the pick of the flush, her quality has already been validated, with three full sisters selling at the 2026 Charnelle Invitational Female Sale for \$16,500, \$11,000 and \$8,500 respectively. V21 is an outstanding individual, combining tremendous thickness, depth of body and genuine carcass shape, all wrapped in a powerful yet feminine package.

V21 is due to calve on 4th October 2026 and will subsequently be left open to flush for the successful purchaser. Further highlighting the strength of this mating, full brothers to V21 are being offered in the Coolabunia and Black Duck Invitational Bull Sales this year. Warilla Charolais guarantees a minimum of five A-grade embryos to the successful purchaser, with the purchaser responsible for all associated flush costs. We are also more than willing to assist with transport to an approved collection centre for international buyers requiring export-qualified embryos. Inspections are welcome at any time prior to the sale. This is a female we are incredibly proud to stand behind and one we believe presents a rare opportunity to access elite genetics.

JBAS: 6

Warilla Charolais

Based in Echuca, Victoria, Warilla Charolais was established in 2011 from our long-standing passion for breeding quality commercial Charolais cattle. Our foundation females were sourced from the renowned Boongatti Dispersal Sale and Palgrove Charolais, with subsequent investments in leading Australian and New Zealand genetics helping to shape the herd we have today. Over the years, we have continued to source elite donor females and proven genetics to strengthen our breeding program, with a particular focus on producing structurally sound, productive cattle with performance, phenotype and longevity.

The ongoing development of our embryo transfer program has allowed us to accelerate genetic progress and build a herd we're extremely proud of.

We are delighted to once again be involved in the National Charolais Sale and are excited to offer the opportunity to flush what we believe is the best female bred in the Warilla program to date. We look forward to showcasing our genetics on the national stage and being part of what promises to be a tremendous World Charolais Congress.

Palgrove Charolais Semen Package

Six Straws of your choice from 3 outstanding Stud Sires

PALGROVE UNDERDOG (PP) R/F ET

The \$75,000 top seller from our 2025 sale, Underdog a Landmark ET son out of a donor from the renowned Festoon female line by Hallmark. He combines proven pedigree with outstanding phenotype. A bull we've always rated highly, Underdog stands out for his softness, volume, depth, structural correctness and undeniable sire presence. He is homozygous polled and combines balanced performance data with the practicality and quality we strive to breed.

With Landmark surpassing \$1.22 million in progeny sales, selling sons to \$80,000, we believe Underdog has all the credentials to become a leading sire of the next generation.

PALGROVE UNBELIEVABLE (PP)

Feature Houlio son from our 2025 sale, selling for \$65,000. A standout from a young age, he impressed us enough to use extensively in both our AI program and as a walking sire.

Homozygous polled, with a strong masculine head, exceptional carcass shape and a 150cm² EMA scan on sale day, he has the structure, constitution and sire presence we value. His pedigree is backed by proven performers, with Foresight, Carbine and Benchmark all featuring on the dam's side.

Balanced EBVs with positive Calving Ease, strong Growth and Carcase traits, and Milk in the top 5% complete the package. A genuine Stud Sire.

Born: 18/08/2020 Tattoo: PK R790E
HETEROZYGOUS POLL / SIRE VERIFIED

PALGROVE RED ROCK R790E (P) (R/F)

We rate Red Rock as one of the best bulls we've ever bred, and with over 300 progeny on the ground, he's confirmed that reputation. We continue to use him heavily in AI and as a walking sire in our herd. Medium framed, thick topped and deep quartered, with excellent feet, balance and doing ability, he's the sort of bull that just gets the job done.

His figures sit through the middle rather than at the extremes, but when you've got that level of structural correctness, consistency and pedigree strength behind them, that's exactly what we like to see.

His first 15 sons at auction sold to \$40,000 twice, to average \$21,133 and we're confident his progeny will make a positive contribution to both seedstock and commercial herds

Palgrove Charolais is proudly owned by Ben and Gemma Noller and Simon and Mym Daley, who purchased the entire stud in 2025 after Ben had managed the operation for the previous eight years. Building on the legacy established by David and Prue Bondfield through more than 50 years of dedicated Charolais breeding, Palgrove Charolais remains committed to producing practical, performance-driven cattle that meet the demands of the Australian beef industry while delivering quality genetics to seedstock and commercial producers worldwide.

The consistency of Palgrove Charolais cattle and their commercial performance is underpinned by the depth of pedigree developed over more than five decades of disciplined breeding and selection. This is reflected in the stud's ongoing success in leading carcass competitions, including the prestigious RNA Paddock to Palate competition, where Palgrove Charolais genetics consistently deliver outstanding feedlot performance, carcass quality and profitability.

MOONGOOL SUGAR PIE 7 (DP2 E163E)

What a wonderful way to celebrate the 2026 World Charolais Congress by offering this exciting young sire prospect. Moongool Victory (P) truly typifies the modern Charolais sire, bred with the Australian beef producer in mind. His pedigree combines some of the most influential genetics from Australia, New Zealand, France, and Northern Ireland.

In our 35 years of breeding Charolais cattle, we believe Victory may be the most complete breeding sire we have produced to date. Once you see him in the flesh, you will appreciate the outstanding phenotype he displays. Victory possesses the ability to finish well, carry extra muscle, and deliver the growth and fertility traits that make him a unique and valuable breeding prospect. He exhibits tremendous strength, breed character, a powerful and masculine head, excellent skeletal structure, and a quiet, gentle disposition.

His pedigree incorporates many of our most successful breeding combinations developed over the past 35 years, making him a highly predictable and reliable sire for the future.

We urge you to join us at the RNA Showgrounds during the 2026 World Charolais Congress to experience the outstanding display of Charolais cattle and to inspect this exceptional young Charolais sire for yourself.

JBAS: 6

In the 1850s Moongool consolidated holding was composed of the runs of several blocks. In 1884 the "Runs" were consolidated but we're not divided until April 1888.

T.L.N. Fitzgerald obtained the first lease on one portion of the run and acquired depasturing rights on the resumed portion. Moongool, which is only 16km South of Yuleba, was purchased by the Price Family in 1954 for 2/6 an acre. It consisted of Brigalow, Belah, Box and Sandlewood scrub-those were the days! Fences were few and far between. Mustering took place most days with a (newspaper wrapped) lunch in the saddle bag. Those pioneering days are gone, and we now have a successful breeding and fattening enterprise here at Moongool. A commercial herd of Charolais cross cows run at Moongool. The old people (Ian and Dell) also reside there.

Our Charolais Stud was founded in 1985 and the Brahman, Simbrah, Angus and Charbray studs added some years later. Ivan, Helen, Iva, Hunter and Tori live at Noorindoo Surat where the majority of the Stud females run. Located on the Condamine River between Yuleba and Surat is Bookkooi.

Our other local property Leabrae, joins Moongool and here we pasture our weaner heifers each year and farm when the seasons favourable. During the dry weather in November of 2019, we purchased Gowrie at Charleville, where we have continued with the Simbrah/Simmental program.

Now for an update on Alison – for the past 25 years Alison has lived and worked in London and Malawi where she continues her medical research.

4 Pick of Rangan Charolais, 2025 Winter drop heifers

Rangan Charolais is proud to present an opportunity unlike any we have offered before, and one that may never be repeated. For the first time, buyers will have the opportunity to select the pick of our entire 2025 Winter Drop heifer crop.

More than 20 years of disciplined selection has produced a female herd renowned for its fertility, functionality, structural soundness, and quiet temperament. These are the females that form the backbone of our breeding program, producing the replacement females we retain and the sale bulls that continue to perform for commercial and seedstock producers alike.

The strength of our female herd is the foundation of our success. At our record-breaking 2026 on-property bull sale, five sires entered stud herds, a testament to the quality and consistency of the maternal genetics behind them.

The choice is yours. Will your selection come from the renowned Showgirl or Estella maternal lines? Will she be sired by the proven Ascot Queenslander, the Victorian record-selling Rangan Duty-Free T79, or influential international sires Jmar Jefferson or LT Countdown, both of which have integrated exceptionally well into our breeding program?

Among the outstanding draft are heifers such as Showgirl W96, a stylish, feminine Queenslander daughter with breed-leading EBVs. Out of an RBM Fargo female, she combines the influence of Merit Roundup, M6 Grid Maker and Gauguin in a pedigree packed with proven performance. Also available is Showgirl W20, another impressive Queenslander daughter from an outstanding SCR Triumph dam, carrying the influential genetics of breed legends LT Ledger and Pinay. These females represent only a glimpse of the depth and quality available throughout the offering.

The question is simple: what value do you place on an elite female?

Every milestone Rangan Charolais has achieved has been built on the strength of our maternal lines. Outstanding herd sires begin with outstanding females, and this offering provides a rare opportunity to invest in the very genetics that have shaped our program. **Selection to be made prior to 15th September 2026.**

Rangan Charolais — Proven genetics. Powerful maternal lines. Trusted performance.

JBAS: 6

The Cook family are fourth-generation cattle producers, proudly farming Rangan Park in North East Victoria. The property was originally selected by Graeme Cook's grandfather in the 1950s and has remained in the family ever since.

Rangan Charolais was established in 2005 following the purchase of a select group of females from the Palgrove Golden Opportunity Female Sale. Foundation females were carefully chosen from the highly regarded Showgirl, Nanette, Estella, Bronwin and Aletta maternal lines, providing the cornerstone of the Rangan herd. Through the strategic use of embryo transfer and artificial insemination, new genetics have continually been introduced as the herd has grown and evolved.

Over the years, many outstanding females have contributed to the success of Rangan Charolais, but none have left a greater legacy than Palgrove Showgirl 6. Purchased as an 11-year-old in the 2005 sale, Showgirl remained an integral part of our program until her passing at 20 years of age. During that time, she produced more than 300 embryos from 21 flushes, an extraordinary achievement. The impact Showgirl had on our herd extends well beyond her remarkable production record. She was the cornerstone of countless memories, with the Cook girls proudly exhibiting her quiet, reliable progeny at local shows from a young age, enjoying significant success along the way. Today, her exceptional maternal strength continues to influence not only the Rangan herd but also many leading Charolais stud herds throughout Australia, ensuring her legacy will continue for generations.

The Rangan female herd is rigorously classed each year for structural integrity and temperament. Females are expected to calve unassisted at two years of age and successfully rebreed within a tight seven-week joining period. Every female is joined through artificial insemination, then backed up by carefully selected walking sires chosen to complement each mating and achieve the herd's breeding objectives.

Performance recording is a key focus at Rangan. Every calf is weighed at birth, weaning, and yearling age, while yearling scanning provides additional carcass data. This information is submitted to Breedplan, ensuring the Rangan herd maintains some of the most accurate and comprehensive performance data available within the breed.

The Cook family remains deeply committed to the continued advancement of the Charolais breed throughout Southern Australia. They are proud to support the breed's future and are honored to be involved with the International Charolais Congress.

Traits Obs: BWT, Genomics																	+\$67

When we were given the opportunity to consign a lot to the National Charolais Sale, we wanted to do something big, something out of the box, something as special as the occasion.

This lot is as special as we can make. We proudly offer to you, the chance to own a 50% share in the calf that showed beside her dam, Starstruck 172S, when they won the coveted Hordern Perpetual Trophy and the Supreme Charolais Exhibit sash at this year's Sydney Royal Show.

She is truly one of the best females we have ever put our tattoo in, and we think she has a massive future. This is only the second animal from our imported Starstruck line to sell in Australia, and it is a rare opportunity to get access to a female of this quality and a granddaughter of the famed SVY Starstruck 409B.

199W is the first animal to sell sired by our elite home-bred sire, Venturon The Stig T42, who is kicking off his career as strong as a sire ever has at VL. Semen has been exported to Canada, and we know he is going to be a cornerstone sire for us.

We love this female's length of front and her added power and dimension through her rear third. To add to this female's incredible phenotype, she is homozygous polled and PA free with great data. These opportunities don't come around often to be a part of a future breed-leading female. A maternal masterpiece backed by a pedigree filled with some of the greats of the Charolais breed.

A special occasion calls for a special female!

Starstruck 199W & Starstruck 172S
Hordern Trophy Champions, Sydney Royal 2026

Venturon The Stig T42 (AI)(P)
Sire of 199W - Trait Leader BW, SS

Specifics of our lot:

- 50% share of ownership in the female
- Full possession of the female is held by Venturon Livestock
- No management costs will be incurred by the Purchasing Partner.
- If the Animal is selected to be shown by Venturon Livestock it will be shown at no expense to the Purchasing Partner.
- All preparation and exhibiting will be under the management of Venturon Livestock. (The animal will also be exhibited in both Venturon Livestock's and the Partners name).
- The partner will be able to conduct two (2) sole flushes a year.
- Share flushes will be done in agreeance with Venturon.
- Flushing will be done with the health of the donor first and foremost and at the advice of the technician.

Please touch base with Venturon to receive a full copy of the partnership terms of Lot 5.

Venturon Livestock

Branding the next generation

Venturon Livestock was founded in 1994 by Andrew and Anne Thompson with the purchase of a female from the Culham Dispersal Sale and a further selection of females from the Kooyong and Breakaway studs. Today the herd is now run alongside their son Harris and his partner Hannah where they annually join 150 Charolais females. Each year a large embryo transfer and AI program is undertaken to maximise their breeding program.

Venturon consistently searches the globe for elite genetics and today the herd is built on top Canadian and American pedigrees. In the recent years, some of the best female lines in the breed have been imported to add to the success and strength of the Venturon cow herd. Top sires are sourced throughout Australia with cow families always at the forefront of a decision. The Venturon stud has exported sires to North America and New Zealand as well embryos to Canada.

The Thompson family has shown cattle successfully across Australia with numerous champions at Perth, Adelaide and Sydney Royal Shows. Some of their more recent successes include the Hordern Perpetual Trophy at the 2026 Sydney Royal Show, Supreme Charolais Exhibit at Sydney Royal in both 2024 and 2026, Interbreed Breeder's Group of Three at Sydney Royal in 2024, and interbreed junior male and both junior and senior females at the 2025 Perth Royal Show.

With every decision made being for the benefit of their clients, the Venturon stud continues to breed cattle that meet the requirements for a vast array of sectors of the beef industry. A proud moment for the Thompson's program was winning reserve grand champion purebred carcass with a pure Charolais steer at the 2023 Adelaide Royal Steer Feature Show.

Vaccinations: 7in1, 3 germ blood

Laura W32 is a wonderful heifer that displays so much length, growth, and softness with a very kind nature. She has enough power and performance to make a real difference, yet remains soft, supple, and very feminine. Her dam is a lovely young Mario cow with a picture-perfect udder always producing a standout calf. We were fortunate enough to secure a semen share in W32's sire Ascot Recharge who has clicked very well over our herd adding some extra performance and carcass quality to his progeny just as this heifer shows.

We haven't bred many polled and gold heifers as good as this one, especially being backed by awesome performance data like this - she will be very hard to part with!

Bauhinia Park Charolais stud was founded by the Holzwart family in the mid 90's. The stud has grown to where we are now joining 250 top quality females with the resulting young sires sold each year at our Annual Bull Sale and in the paddock. Located just 30km East of Emerald in Central Queensland, the majority of the Charolais herd are run on our property 'Kensington'.

Ryan & Rachel are now based at 'Kensington' and have taken the reigns of the Charolais stud herd. We work hard to produce well balanced Charolais cattle with great constitution, natural muscle expression, fertility, and ability to finish easily. Enquires are always welcome.

Another polled red factor female picked right off the top shelf. W84 is absolutely bred in the purple being an IVF daughter from one of our favourite home-grown donors & sired by the highly famed Palgrove Red Rock. We have retained a full sister to W84 and have two outstanding full brothers from the same flush. There is so much to be gained from the predictability in this pedigree – maternal strength with all the right bull breeding credentials. W84 herself is a beautiful soft bodied heifer with plenty of bone, depth, and so much easy fleshing ability. Heifers of this calibre don't come around every day, which will you choose?

Elridge Charolais

Pick of the 2025 Retained heifers

This is an exciting and rare opportunity to add something so very special to any herd. **We have selected 60 elite heifers from our 2025 W drop females to progress our herd to new heights, they are Breedplan and DNA recorded and from our sire lines with international acclamation.** Each female has a sire line with unique traits, this combined with our reliable, strong cow families that have been developed at Elridge for over 30 years, presents a prospect with enormous opportunity.

Elridge Charolais has been operating in the Mary Valley, South of Gympie, Queensland for over 30 years. We are a family-run business, and we are enthusiastic about Charolais. Our registered Charolais program started in 1991 with the purchase of two Gunnadoo females, fast forward over 30 years and around 200 females calve each year at Elridge. We take a balanced and simple approach to our females with an emphasis on commercially relevant traits - constitution, fertility, mothering ability, temperament and longevity. Our strong female herd is the basis of our operation; our pedigrees are chock full of genetics that have stood the test of time, cow families run deep and provide reliability in their progeny. Our cow herd is placed under phenotypic selection and supported by data, they calve at around 2 years and every year thereafter. We are passionate and dedicated to breeding functional, profitable Charolais that satisfy the requirements of our clients.

Elbridge Sires

Moongool MR T539 (P) – The National Top seller in 2024 was long, thick and robust, tragically lost to injury only a few days into his season, there is only one female sired in our herd and she is in the offering.

Moongool MR S127 (P)(Sunny) – paternal son of the acclaimed GDA Parfait who sired the Australian Record priced Charolais bull. We used “Sunny” to add a touch of French back through our herd. His females have a bit more bone, are thick topped and have a great deal of capacity. His daughters are milking well and proven to be good mothers. (10 females)

Elridge Quantum (AI)(ET)(P)(R/F) – This Sire was a standout and his progeny have excelled at every level. Unfortunately lost last year through injury, Quantum exhibits traits that align phenotypically and genetically. His progeny have exceptional growth and finish, the females have great mothering ability and udders. We have kept a Stud Sire “Quantum Leap” from old Quantum and there won’t be another opportunity to secure his females. EBV’s - Top 1% 200d, 400d, 600d, mature cow, IMF%, Top 2% carcass weight. Quantum sired progeny Qld Charolais Carcase Classic 2025 results – 1st highest value add heifer, Reserve Champion Pen (3) feedlot weight gain. Qld Charolais Carcase Classic 2024 - Reserve Champion steer. (8 females)

Paringa Pinay P385 (AI)(P) – “Penn” is a bit of a favourite and still working here at Elridge. His progeny are thick and deep and have perfect udders and a tremendous constitution. The females are commercially relevant and are built for longevity. Penn sired progeny Qld Charolais Carcase Classic 2023 – Champion Feedlot weight gain and Champion feedlot gain heifer, 2nd highest value add heifer, Champion Feedlot gain heifers (3). (13 females)

LT Countdown 9712 PLD (P) – we have used Countdown over some of our yearling heifers for several years. They are moderate, thick, good milking females that have the capacity to breed bulls. (2 females)

Palgrove Precision P2121E (P) – this bull has bred exactly what we wanted, magnificent females. Precision is by one of the most prolific sires in modern Charolais - Landmark. The Precision females are built right, they are wedge shaped, have ideal udders and a solid constitution. EBV’s - Top 2% 400d, mature cow, IMF%. Top 7% 200d. Precision sired progeny Qld Charolais Carcase Classic 2024 – 1st and 2nd value add heifer, Champion pen (3) feedlot weight gain, Reserve Champion weight gain. (14 females)

Violet Hills Shamrock (P) – we purchased Shamrock for a Violet Hills record top price in 2023. He is siring supple skinned, easy doing, good constitution cattle. His first daughters will be calving this July and are shaping up very well. (12 females)

WAKEFIELD AUTUMN 15 (BIS L974E) (P)

What a wonderful opportunity to purchase your Pick of The Pair in these two exceptional females from the top shelf of the Wakefield herd. Autumn 62 has been tested homozygous polled, sire verified and BPA free, she is a stylish, slick coated, deep bodied female with a soft muscle pattern that ticks many boxes. She has a wonderful temperament, is structurally correct and has longevity on her side. Her dam N590 is fertile, has a good constitution and has just calved again as an 11-year-old cow. Autumn 15 her grand dam was under 12 months heifer champion at the Charolais National show in 2016. Wakefield Autumn 62 is halter broken and has been left unjoined.

Wakefield Charolais Stud was founded in 2004 by Greg & Jenny Frizell, after Greg's Grandfather started using Charolais in 1970. Our children are the 7th generation of Frizell's to farm at Wakefield, and both are involved in the cattle industry. We are very confident that the Wakefield stud is in good hands going forward. With substantial ET and AI programs in the last twenty-two years we are now joining 300 top quality Herdbook registered females selected for industry focused traits, while still maintaining good structure, fertility and phenotype.

The sires that are used in the Wakefield herd are selected for their temperament, calving ease, growth, muscle and finishing abilities and these traits are helping us sell our bulls into many studs and commercial operations annually. Wakefield is located 55km East of Armidale and home to our breeding herd and sale facilities. Another property Chandler, 10km closer to Wollomombi is where we run our weaners, joined heifers and grow out our sale bulls. Wakefield bulls have a strong following in the Northern Rivers, Mid North Coast and Tableland areas and it is due to their temperament, longevity, functionality, fertility and doing abilities. After 20 years of bull sales, we are very grateful to our repeat clients.

Your pick of Four Show Heifers exhibited at the EKKA Feature

Ash-Lin Charolais are offering the opportunity to select directly from their show team at the EKKA Feature. Your choice of four heifers representing renowned maternal families.

ASH-LIN NEXT EDITION (ACW N9E) (P/S)

DAM: ASH-LIN PRINCESS Q21 (ACW Q21E) (P)

ASH-LIN PRINCESS 19 (ACW N1E) (P)

A powerful yet feminine Moongool Pilgrim daughter from one of Ashlin's most consistent female families. W8 is a soft, deep-bodied heifer with excellent capacity, strong topline, tremendous body length and plenty of natural thickness through the hindquarter. She stands square on a sound set of feet and legs while maintaining the balance and style expected of an elite stud female.

The Princess cow family has consistently produced functional, productive females within the Ashlin herd, and W8 continues that tradition. Combining proven maternal genetics through Ashlin Princess Q21 with the performance and carcase qualities of Moongool Pilgrim, she has all the credentials to develop into an elite breeding female with donor potential. We believe this female will go on to be an excellent bull producer.

Veejay Downs Buyers Choice

Your pick of 3 Poll Show Heifers

We are offering for your selection some of the top females in our herd. We have selected these females that are closely related to show the genetic consistency we strive for. Pythagoras has been a leading sire for us commercially and has now been given a select mob of stud females. His mother is still in the herd producing outstanding calves every year in the pressure of the Queensland tropics. Show heifers of this quality bred in Central Queensland with performance data to back them are rarely offered.

Joining Sire: DSK DT Very Good Rex V2 (P)

Rex is our new exciting sire purchased privately off DSK and with the first few calves hitting the ground safely we are really excited what he can offer northern herds growth, weight and plenty of fat cover and softness as well as a beautiful tropical coat and skin. This will be the only opportunity to purchase his genetics early. The heifers have been running with Rex since 1 June 2026 heifers can be held at Inga Downs free of charge until a positive pregnancy test is obtained.

Joining Sire: DSK DT Very Good Rex V2 (P), 600WT EBV +74

James & Aleisha Pisaturo

A: "Inga Downs" Dingo, Qld.

T: 0429 188 523

E: james@vjcharolais.com.au

JBAS: 6

Veejay downs was started in 1987 by Henry and Verona Pisaturo in 2008, it was passed to James Pisaturo and with the purchase of some heifers from Mandalong it was reestablished. These females were closely linked to Nandillyan Peugeot and created a strong base. Bulls from Rosedale and DSK were also utilized. In 2015 the herd was moved to 'Inga Downs' southeast of Middelmount in Central Queensland. Since then all Veejay Downs progeny have been bred at 'Inga Downs'. It is currently owned and operated by James, Aleisha, Olivia and George Pisaturo.

Our operation focuses on breeding bulls for our own commercial program and has given us the ability to ensure our bulls thrive in the Central Queensland environment. As all commercial bulls prepared for our own use are in the same management group as our sale team we ensure our bulls are prepared to survive. The CQ Premier Charolais Bull Sale is the only place we offer bulls for auction.

We have recently expanded the operation to provide a line of paddock bulls to our clients. Our program is control mated with all cows calving from late spring to early summer in one management group to suit our wet season. All cows that fail to rebreed are culled to ensure selection pressure with our cows run under the same management as our commercial herd. We are Breedplan recorded with all progeny remaining in the herd until 400 day scans are done as well as the Charolais Standard bundle on all calves to include genomics.

Our Cattle have been validated by our success in the Clermont Cattleman's Challenge with our home bred Charolais sired steers winning 5 of the last 7 years. This competition starts with steers being backgrounded for 250 days in the same paddock then fed for 100 days on grain. There are weight gain, carcase and taste test aspects to this competition making it a very comprehensive paddock to plate competition.

[illegible]

BORN: 10/09/2024

TATTOO: DSK 24V28E

ANC GUSTAV (ANC G218F) (P)

SIRE: ANC KIND (ANC K155F) (P)

ANC ISABEAU (ANC A156F)

VENTURON CRUSTY DEMON (VE7 C5E) (P)

DAM: VENTURON GORGEOUS (VE7 G8E) (P)

VENTURON ELLA (VE7 E5E) (P)

Velocity is an exceptional Charolais stud sire prospect. A rare combination of high performance and structural integrity with an impressive pedigree to match. A real power and strong muscled sire with a clean, smooth shoulder and a long, balanced body on very good leg and foot structure. Good testicles and a clean sheath complete the package in this true Charolais sire.

Dam, G8 was awarded Grand Champion at Sydney Royal in 2014 and continued on to make a big contribution at DSK including son K25 who we used in the stud with a good line of females retained. A twin Gold Logie daughter was top price at our female sale in 2021.

Sire, Kind was purchased and shared with Moongool and became an influential sire with excellent daughters and many high selling sons for us, including the 2019 Charolais National show and sale Champion & high seller, DSK Kind a Neat. At Moongool his progeny continue and have sold to a top of \$100k and another son, M Pilgrim is really delivering the goods for the Price family. We believe Kind has made a valuable and positive impact in the Charolais breed and continues to do so.

Semen retained for in-herd use. BPA free.

 JBAS: 6

DSK Charolais began in 1995 with the purchase of two young heifers, Palgrove Estelle 31, sired by Peter Patriation, and Rosedale Beatrix 9, sired by Mr. Perfect. More females were introduced in 2001 with the purchase of Pinnaroo Red Trendie S81E (starting the DSK Wendy family) & Pinnaroo Red Fairy Floss S74E (starting the DSK Flossy family).

In 2005, the cow DSK Juliette U1E came to the fore with her son DSK Red Emperor Y13 being awarded Supreme Champion at the Charolais National Show & Sale, selling for \$19,000 to Ian and Ivan Price of Moongool Stud. These cows began our extensive flushing program using sires such as Gunnadoo Nugget and MNE Bold Venture, LT Wyoming Wind & LT Western Edge.

Later, Temana Gold Logie and ANC Kind both in partnership with the Price family's Moongool Charolais. In 2021 we decided to downscale our Charolais and offered our entire herd at our Whole of Herd female sale. From that, we had 8 older females plus 3 heifers, that were not sold through auction that we retained and built our herd back up from as well as embryos that we had collected over the years.

We are extremely proud that our DSK genetics and progeny can be seen working well and complimenting many varied programs in successful Australian Charolais herds around the country. Today we maintain a female herd of around 30 to 40 breeders and sell bulls and females privately and at select multi-vendor sales.

JBAS: 6

Established in 2013, Cassaglen was founded on the purchase of two dark red Panache heifers from Mullum Charolais. While their colour made them undesirable, to us they were a strong genetic foundation and more than a decade later, their legacy continues.

The Littler family gave us a rare opportunity to add several elite cows to our herd, including Panache full sisters E20 and D27, and H38, who is the dam of Scarlet Fire. In 2016, Ben and Amanda Adams gifted our boy's embryo calves from Advance Lyric. One of those calves, Lady Kingswood, went on to produce Cassaglen Raptor — a bull who turned lifelong dreams into reality. Influential genetics include PINAY, TR Red Smoke, Emblem and Raptor. Limited space forces us to be highly selective, retaining only the best females.

Cassaglen is proudly family driven and evolves around our young sons Fletcher, Darcy and Emmett who play an active role in all decisions and are helping shape the future of our herd.

Conditions of Flush:

- Offering a single Flush either Conventional or IVF
- We cover the cost of on-farm programming and embryo recovery through Ced Wise AB (Conventional Flush) or IGT (IVF Flush)
- Other providers will be considered by mutual agreement only, the purchaser will cover any additional costs associated with using another provider.
- Minimum 4 A Grade Embryos
- Any embryos over 10 will be split 50/50
- Cassaglen Raptor semen supplied for the flush free of charge, if the purchaser chooses to use their own semen, they are to cover all costs associated with the semen including shipping to providers
- Purchaser is responsible for all shipping and freezing costs on embryos (except the portion over 10 that will be owned by Cassaglen)
- Donor is open and ready to flush after Ekka- IVF Flush will be completed by the end of August. Conventional Flush will need to be completed by 30/10/26 unless otherwise negotiated.

TR RED SMOKE (OAU B6641E) (P)

DAM: MULLUM ALYSSA 2 (BLA H38E) (P)

PALGROVE ALYSSA 44 (PK A338E)

Scarlet Fire has consistently produced quality progeny especially with our 2022 Ekka Interbreed Champion- Cassaglen Raptor. She is a big roomy cow that is hard to fault very easy keeping, maternal and sound. She has a good smooth coat type and a balanced productive udder. Her progeny have plenty of style and will catch your eye in the paddock.

This is the first-ever opportunity to secure a flush from a matron of our herd and we thought for World Congress we would make it even more special by offering the exclusive opportunity to secure one of our most consistent pairings. Raptor X Scarlet Fire!!

Should the purchaser choose to flush to Raptor, progeny will be full siblings to Fire N Ice, who was awarded Supreme Exhibit at the Warwick Show at just 9 months of age. Her 2025 Raptor daughter- Light My Fire, will be exhibited at Ekka 2026, be sure stop by and check her out. Her first Raptor daughter, Fireglow has been retained in the herd she is an easy keeping cow like her dam with great constitution and quiet disposition. It was only her dark red colouring that kept her from the show ring. Her first Raptor son, Unleaded was successfully shown at Beef and Ekka 2024 winning his class at both events. Unleaded semen is available on enquiry.

Her Maternal brother Wide Load by Raptor will be exhibited at World Congress. She is also maternal sister to Snowflake who was Junior Champion Heifer at Ekka 2022. Her dam is still producing for us at 13 years old. Definitely a cow line we are incredibly proud of and excited to offer.

Sired by Johnny, sold 2026 for \$20,000

Donor: MILFORD NARDIA (P) JOH Q45E is a very valued Charnelle donor. Imported from New Zealand as an embryo, she is one of only five active Sparrows Braxton daughters in Australia. She is a moderate framed female, very tidy in structure and a lovely temperament. Breedplan highlights include a top 10% ranking for low birthweight, calving ease, milk & fertility, while ranked in the top 15% for short gestation. She is the dam of our highest ever priced unjoined heifer when Charnelle Nardia 3 GKA 24V45E (see photo) by Johnny, sold for \$20,000 in March this year. We have three calves from the Robins RS mating which were born easily and have very good growth and style.

We are pleased to offer this package of 4 A Grade embryos on a price per embryo basis. The Purchaser of this lot has the choice of 4 embryos to be chosen from the following three combinations of two embryos in each. 50% guarantee if implanted by an accredited technician within 12 months. Embryos stored at The Repro Group Allora, Qld.

- 2 x A Grade Embryos Milford Nardia (P) JOH Q45E x Johnny (P) (FF) OAF K4440F - Johnny has BPA results pending.

Charnelle Charolais
Proven Cow Families and Top Class Sires

Graham and Katrina commenced Charnelle Charolais in 1992 with females from Trevlac and Tallegalla. Females have been added from Palgrove, Moongool and Fernvale, and others have been added throughout the studs 34-year history. Embryo transfer and Artificial Insemination have always been a large part of our breeding program, successfully introducing new genetics into our herd. Charnelle has selected genetics globally, and marketed semen from ten sires including JWX Silver Bullet and G Bros Thin Red Line from Canada in 2010.

In 2013 we selected D'Angely and Gallway (both Polled Full French) from France and in 2016, Elder's Blackjack and CML Distinction from Canada. Then in 2018, Johnny & Nougat (both polled Full French) were added to our program. In 2024, with Black Duck Charolais, we secured the Australian semen rights to the new exciting New Zealand sire Silverstream Saint Martin. Semen from our new Homozygous Polled Full French Bull Robins RS arrived in January 2025. Johnny & Robins are two of the sires featured in our lot 13 Embryo Package.

We are very satisfied with the influence these bulls have had, not only in our breeding program but in herds right across Australia. It was very satisfying that Elder's Blackjack from Canada, whom we selected for use in Australia, was voted World Champion Charolais Bull in 2020.

We have imported embryos from the USA, France & New Zealand to enhance our breeding program. Embryos imported in 2008 from Camp Cooley USA resulted in two very influential females in our herd, Elle E10E & Emma E50E (both by RC Charlie). These females became donor dams in our herd with excellent EBV's, temperament, structure and Homozygous Polled. Elle E10E produced Charnelle Panama P25E by Elder's Blackjack. One of our greatest achievements has been to market Charnelle Panama semen to Ireland, UK, New Zealand, South Africa, Norway and Germany, with very positive results from progeny in these countries.

Our herd comprises about 70 females, and we sell about 25 bulls a year with our main bull sale being The Coolabunia Classic Bull Sale The Annual Charnelle Charolais Invitational Female & Genetics sale has been held at Toowoomba for the last 16 years.

Johnny (P) OAF K4440F

Robins RS (P) OAF R484F

Charolais Anniversary Bell # 2

To commemorate 50 years of the Charolais breed in Australia, the Charolais Society ordered from master craftsmen, Kents Saddlery, Stanthorpe, Queensland specially engraved Condamine Bells. There were only 12 bells produced, individually numbered and they will not be reproduced. This is a once in a lifetime opportunity to obtain Bell #2. The Bell #2 was provided to Western Australia to recognise the state the first Charolais calf was born in Australia. The #1 Bell auctioned made \$5,000 selling to Henry Pisaturo at Beef Australia 2024.

Proceeds split 75% Western Australian Region
25% Charolais Youth

Own a piece of the breeds history and support the development of Breed and Youth initiatives.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
- (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and conditions by bidding at auction.
2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors, agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.
- (b) When used in these terms the expressions "companion animals" means all animals originating from a property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
3. The following applies in interpreting these terms and conditions:
 - (a) The following words have the following meanings:

Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;

Livestock means animals auctioned pursuant to these terms and conditions; and

Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions

 - (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
 - (ii) plus any GST added in accordance with clause 12.
 - (b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
7. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interests of the vendor and need not give reasons for doing so. The minimum bid for liveweight selling is 0.2 of a cent (\$0.002).
10. A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:
 - (a) the purchaser's name; or
 - (b) the bid card number which identifies the purchaser; or
 - (c) the name of the person on whose behalf the successful bid was made; and
 - (d) the Property Identification Code (known as the "PIC") of destination.
12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.
13. As soon as practicable after the fall of the hammer, the buyer shall if requested by the agent, sign the agreement for sale.
14. If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in a written agreement between the buyer and the auctioneer that was made before the fall of the hammer.
16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.
17. (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
- (b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.
- (c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.
18. (a) Subject to this clause the sale is complete on the fall of the hammer.
- (b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:
 - (i) delivery is taken by a representative of the buyer;
 - (ii) departure of the animal from the purchaser's delivery pen; or
 - (iii) one hour after the last animal is:
 - a. in the case of pre-sale weighing, sold; or
 - b. in the case of post-sale weighing, weighed.
- (c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.
- (d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold at such price as the purchaser and the agent may agree.
- (e) This sub-clause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, through delivery to and from the scales, to the buyer's delivery pen and on to the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This sub-clause does not apply if the agent makes an announcement to that effect prior to sale.
19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.
- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.

- (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner the female was pregnant on that date.
- (d) For cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard account to the purchaser's account on the NLIS database no later than midnight on the day of the sale.
- (e) Where livestock have a food safety or market eligibility status derived from the NVD and/or the NLIS/ERP database, the agent will inform the buyers by presale catalogue in conjunction with vendor branding and/or announce the status prior to the offering of those lots.
20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
 - (a) does not acquire title to the livestock;
 - (b) holds the livestock as bailee only for the vendor;
 - (c) must act in a fiduciary capacity in its relationship with the vendor;
 - (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
 - (e) is responsible for the safety and well being of the livestock;
 - (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
 - (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
21. In addition to clause 20, if payment is not made according to clause 15, but delivery has been made to, or possession obtained by, the buyer or its representative:
 - (a) The vendor or its agent may repossess and resell the livestock and enter property owned or occupied by the buyer or its representative if necessary to do so; and
 - (b) Interest may be charged at the rate usually charged by the agent for overdue accounts on any amounts which remain owing at any time.
22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.
- 23.1. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.
- 23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- 23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.6 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.
- 23.4. Title to the livestock does not pass to the agent or a nominee of the agent unless the agent, by written notice to the vendor, notifies the vendor that it is to be transferred to the agent or a nominee of the agent.
- 23.5. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
 - (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
 - (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.
- 23.6. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).
- 23.7. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
 - (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
 - (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- 23.8. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.
- 23.9. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:
 - (a) by this clause 23, other than as it expressly provides; or
 - (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.
- 23.10. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.
- (b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
- (c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
25. The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.

CHAPTER THREE - VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
27. The warranty of a vendor is that livestock and their companion animals offered for sale at auction:
 - (a) pass AQIS and other regulatory authority requirements and inspections at the time of slaughter;
 - (b) are of merchantable quality;
 - (c) carry an NLIS device in accordance with State law;

- (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in the National Vendor Declaration, the livestock will have those characteristics or will be fit for the particular purpose or market; and
- (e) all information in any National Vendor Declaration provided by the vendor is true, complete and correct in all material respects.
28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.
29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.
30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
31. Where a sentinel animal of a lot tests positive for chemical residue, and provided such test is certified and notified as required by these vendor warranty terms, then:
 - (a) the buyer will be entitled to delay payment for the price of all livestock in that lot; or
 - (b) the vendor has the option, at the vendor's cost, of collecting the companion animals and returning them to the vendor's property; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.
32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
 - (a) any error, by the auctioneer, of transcription of information from the National Vendor Declaration completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
 - (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
 - (c) any failure by the auctioneer to disclose prior to bidding, and in the pre-sale catalogue, that the vendor has failed to provide a National Vendor Declaration that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by AQIS. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the AQIS certificate, existed prior to the fall of the hammer.
35. A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
 - (a) a certificate is issued by AQIS which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
 - (b) the certificate is received by the selling agent either in its original form or by fax by 5:00pm on the 7th day after the fall of the hammer; and
 - (c) if the condemnation is due to chemical residue the certificate follows testing in an AQIS approved laboratory which establishes maximum residue limits in excess of the Australian limit.
37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of the following:
 - (a) bruising,
 - (b) fever,
 - (c) partial condemnation, or
 - (d) emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY STATE LEGISLATION

NSW Legislation

Property, Stock and Business Agents Act 2002 Warnings

Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (i) to abstain from bidding; or
- (ii) to bid to a limited extent only; or
- (iii) to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Tasmanian Legislation

The auctioneer must not appear to acknowledge a dummy bid. A buyer must not give, agree to give or offer a gift or other consideration to a person for abstaining from bidding and a person must not accept any gift or consideration for abstaining from bidding.

A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or to do any other thing which may prevent free and open competition.

Western Australian Legislation

Auction Sales Act 1973 s31 NOTICE

It is an offence to:

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- (ii) abstain or agree to abstain from bidding as a result of such a promise;
- (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.
